FEATURES

- 1 ANTI-STATIC:** Electrostatic discharge through anti-static design (grounding device and top flange drilling).
- 2 STEM DESIGN:** The high-strength stem design includes blowout-proof functionality for safe operation and exceptional service life.
- 3 STEM BUSHING:** Non-corrosive, heavy duty acetal bushing absorbs actuator side thrust.
- 4 DIGITAL TAG:** Each valve is uniquely and easily identifiable by simply scanning the QR Code on the product identification tag in accordance to IEC 61406.
- 5 BEARINGS:** PTFE impregnated steel bearings precisely align the upper and lower stem.
- 6 STEM SEAL SYSTEM:** The live-loaded, self-adjusting packing design features a primary and secondary sealing principle to comply with the most stringent fugitive emission requirements.
- 7 SEAT:** The unique virgin-PTFE (minimum 3 mm thick) seat features a geometry that lowers seating and unseating torque while reducing wear on the contacting parts.
- 8 SEAT ENERGIZER:** A resilient seat energizer extends completely around the seat, including the disc hub providing uniform force sufficient for zero-leakage.
- 9 DISC:** The disc is encapsulated in virgin-PTFE (minimum 3 mm thick) for superior sealing against the most aggressive media.
